Number of Crimps Required*

- Loos & Co. tools should use Loos & Co. fittings, Nicopress tools should use Nicopress fittings. Those are the rules. Get over it.
- Always check crimps using the matching go/no-go gauge. If the crimps don't pass, your crimping tool needs to be adjusted.
- For more information give us a call 800-727-7471 or email us at safety@sapsis-rigging.com
